

Important! Change in the WJOS Logon Process

Some of you have already noticed that the logon BOX for WJOS has changed in the last couple of days. For those of you who haven't accessed the system this week, **please note that you may get only two fields instead of three on the "Enter Network Password" screen (the Domain field is gone)**. If you get the two field login box you will need to combine the domain with your login ID. See procedures below:

DWD Staff

- In the User Name field, type dilhr/ and your logon ID. Do not put any spaces between the slash and your logon ID.
- Enter your password in the Password field and click on the OK button.

Non-DWD Staff

- In the User Name field, type dwdpub/ and your logon ID. Do not put any spaces between the slash and your logon ID.
- Enter your password in the Password field and click on the OK button.
