

Improved WebIntelligence Reports

We have added two fields to the following WEBI reports: **ERS Employer Contact Listing by County** and **ERS Employer Contact Listing by County, SIC, and Size** .

- One field identifies if the Employer Contact is registered to use WJOS.
- The second lists the last date the Employer Contact actually used the system.

If the Employer Contact is registered to use WJOS, but there is no date listed in the last date field, the individual never used the system after he/she registered.
