

Important! Spell Check NOW in WJOS

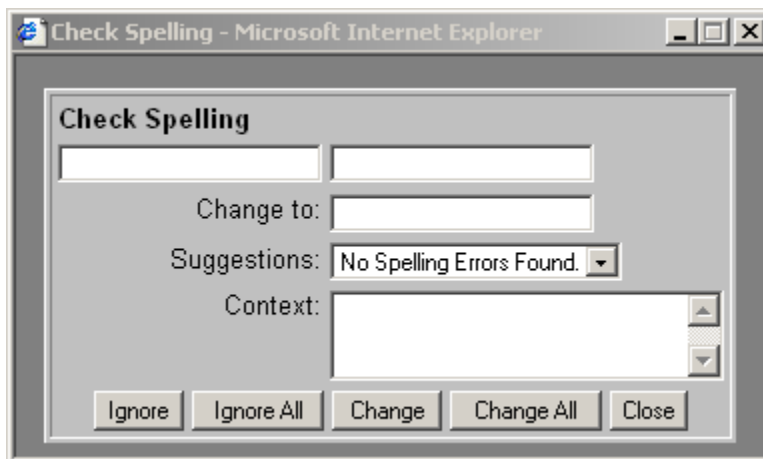

We've added a spell check feature to the WJOS system!

You will notice this change on the system beginning Monday July 14, 2003.

The new spell check feature is activated whenever you save a job order as complete, or when you save changes to an existing job order. The spell checker will scan your job order for spelling errors. A pop-up window will display, giving you the option to either ignore or change to the suggested spelling, much like the spell check feature in Microsoft Word.

The window will display as below if no spelling errors are found:

If you find that the system is giving you errors on commonly used or correctly spelled words, please let us know so we can include such words in our dictionary.
