JobNet Business – System Fixes

The JobNet Business design team has been busy responding to your reported issues and have implemented fixes for the following system problems:

- Employers using Microsoft XP-Professional seeing black backgrounds in multi-line text boxes
- Employers having difficulty saving job orders complete
- Employers getting system errors while using the Manage Job Orders function
- Job Orders being saved complete without O*net codes

We are evaluating enhancement requests and will continue to make improvements to the system as time allows.

Thank you all for both your patience and your good suggestions!
