

## JobNet Business Enhancements

### JobNet Business Enhancements (Staff)

- Enlarged both 'Additional Compensation' and 'Professional Licenses/Certificates' fields to 500 characters each.
- Default datagrids to **descending** sorts wherever possible.
- Spell checker now both ignores or changes a word everywhere on the job order, rather than field-by-field.
- Employer contact search offers a "by county" search when searching by first or last name.
- Column added to tickler and activity lists to indicate how many days are remaining, if the item is associated with a job order.
- Staff can now view all Requests for Assistance for their WDA.
- Service Plan – Now defaults staff person to user logged on.
- Staffing Agency indicator now carries through to all job orders for that employer.
- Added an event history for changing worksite from the job order, displays both the address of original site and the address of site job order was moved to.
- Modified the JobSeeker Match by O\*net report to limit the job center list to ASSET job centers.

### JobNet Business Enhancement (Employer)

- Employers now have a "Feedback" form to use to email questions/comments to JobNet Business Help Desk by clicking 'Feedback' on the menu tree, as shown below:

The screenshot shows a web browser window with a menu tree on the left and a feedback form on the right. The menu tree includes options like 'My Job Orders', 'Request for Assistance', and 'Feedback'. The feedback form has a yellow background and contains the following text:

Please provide the following information, then click Send:

**From:**  
*Your Name and Phone Number:*  
JENNY JACOBS, (608) 555-1212

*Your Email Address:*  
jjacobs@abc.preschools.com

**Message:**

Text Limit: 5000 | Text Entered: 0

Send

### System Problems Fixed

- System Error when emailing a job order preview for a job order that had not yet been saved.
- When staff click on a single-line text box, data in that field will no longer be highlighted to allow for edits without deleting what was in the field. Due to browser constraints, if staff **tab** to a single-line text box the entire field will still be highlighted. Staff may click inside the box to remove highlight and make their edits.
- Problem selecting certain NAICS codes from the pop up box.
- Job Orders removed from JobNet not appearing on system report if no contact was associated with the job order.
