JobNet Business Updates

Two enhancements were made in JobNet Business this morning:

- The website address on the Profile screen now cascades (automatically defaults) to all sites attached to that Profile. If the website address for a Site is different from the Profile, the website address needs to be updated on the Location screen for the Site.
 - If staff change the website address on the Location screen, it will not be overwritten by the EXPOE Quarterly Update. EXPOE doesn't have nor update the company's website address.
- When a job order is reopened, the Last Contact Date field on the Job Order Management tab will be automatically updated with today's date.
